

Cloud JumpStart

Bring your technical team into a focused, three-day workshop to get hands-on experience and collaborate on your specific use case. Ideal for kickstarting your evaluation of Google Cloud Platform or launching an initial project with deep technical help from Devoteam G Cloud.

Key Activities

Understanding of GCP areas or products, including benefits and differentiators from competing offerings in the market.

GCP Quick Start Session

Get GCP overview on core products relevant to your solution.

Design Workshop

Scope and define a proposed architecture for your specific use case

Solution Feasibility Using a Prototype

Explore solutions using a prototype to validate and prove technical feasibility.

Business Case

Draft business oriented report to identify potential of the solution, expected impact and proposed next steps.

Objectives

- Gain baseline knowledge of GCP concepts
- Evaluate scope
- Whiteboard and discuss cloud solution
- Assess solution feasibility using a prototype
- Develop a powerful business case

Benefits of working with Devoteam G Cloud

Devoteam G Cloud is Google's Premier Partner, which means we've achieved the highest levels of competency and performance. Our customers can benefit from our status as we provide the top level of support, training and a portfolio of services that includes strategy consulting, deployment and migration, change management, development and migrations.

Deliverables

- Baseline understanding of GCP
- Design and architecture whiteboard recommendations
- Solution Feasibility Prototype
- Executive report

Product Areas

- Infrastructure
- App Development
- Data and Analytics
- Machine Learning

Scope and Pricing

- 3 day engagement (offsite or on-site at your location)
- Maximum 10 participants
- Pricing is set at €4,500, excluding expenses

Devoteam G Cloud didn't ask us "What do you need?" They asked us what we do and what we want to achieve in the future. They helped us select the right products and services that met our requirements to support our development.
